

RICHARD CARY

SOFTWARE ENGINEER

EXPERIENCE

SOFTWARE DEVELOPMENT PROJECTS

General Assembly

2022 - 2023

- [Primo Coffee](#) - Vue.js, Vue-Router, HTML, CSS, Javascript, Express, Node.js, Mongoose, MongoDB, Render, Netlify
- Developed a full-stack application that allows users to keep track of their favorite coffee recipes.
- Programmed a full-stack application using a Vue.js, Vue-Router, Express and Mongoose while deploying the backend on render and frontend on netlify.
- Application has full CRUD capabilities and uses MongoDB to store information.
- In the future I plan to implement full authorization on the app and the ability for users to share and comment on each others concoctions.
- [dotBeats](#) - React JS, React-Router-Dom, Node.JS, Mongoose, MongoDB, Javascript, Render, Netlify
- Developed an application that helps users keep track of their favorite songs/music videos.
- Programmed a full stack application with a team using a MERN stack which included Mongoose, Express, React and Node.
- Supervised this project as the product manager by prioritizing tasks and handling merges through github while resolving any errors in the code.
- Advanced this project with a backend API that was set up with Mongo to display full CRUD routes.
- Finalized the application with React while using a unique UX/UI design that was deployed using Netlify.
- [Amiibo API](#) - HTML, CSS, Javascript, JQuery
- Generated an application where users can search for Amiibos, a popular product of Nintendo with a robust character catalog.
- Produced a front-end application using HTML/CSS/Javascript/JQuery.
- Completed an application that is hosted through Github and uses Ajax to retrieve information from the AmiiboAPI database.
